SECTION A (15	5 MARKS)
Answer all questions	
1. Select the correct answer from the given alte	
correct answer in the box provided.	
i): Which term represents the results	of processing raw facts like numbers,
symbols, letters, pictures and sounds	in a computer?
A. Data	C. Information
B. Program	D. Website
ii) To prepare a computer laboratory f	for the Form Four final examination, the
headmaster asked the system admini	strator to buy a non-impact printer which
is very fast and which could produc	e printouts of higher quality. Which type
of printers will be the best choice?	
A. Dot matrix printer.	
B. Inkjet printer.	
C. Thermal printer.	
D. Laser printer.	
iii) How many main components made u	up a typical computer system?
A. 2	C. 3
B. 4	D. 5
iv) Most of the teachers in a certain so	chool that uses computers in performing
their daily activities reported the prol	blem of disappearing some files. Which is

iv the best way of preventing data from loss and damage?

A. E	Backing	up	the fi	le.

B. Using password.

C. Updating anti-virus.

D. Using antiglare screen.

viii) Study the Screenshot provided in Figure 2 and then answer the qu	uestion that
follow:	
Figure 2	
Which alignments of text align the text to the right margins?	
A. 2	
B. 1	
C. 4	
D. 3	
ix) Modern Education Institute has a LAN in its Primary School and	another set
in its Secondary School which are located in the same district. Wh	nich device
is needed to connect two LANs to enable data sharing and resource	es between
them?	
A. Modem	
B. Hub	
C. Switch	
D. Router.	
x) While preparing a Form Two terminal results in a worksheet, a teach	her noticed
an error message \$VALUE! What does this error signify?	
A. Used incorrect numeric values.	
B. Used incorrect argument to the formula.	
C. Used incorrect cell reference to the formula.	
D. Used a blank cell or dividing by zero.	

2. Match the functions of different types of operating systems in **List A** with their corresponding types of operating systems in **List B** by writing the letter of the correct answer below the item number in the table provided.

LIST A	LIST B
i) A system that performs a task by reading the	A. Single task operating system
command after user pressing the enter key.	B. Multi-task operating system
ii) A system that enables more than one user to	C. Single user operating
access a centralized computer.	system
iii) A system that runs only one user program at a	D. Multi-user operating system
time.	E. Command line operating
iv) A system that uses priority scheduling to	system
allocate each task a portion of the time in a	F. Utility operating system
CPU.	G. Menu driven operating
v) A system that cannot allow a user to run both	system
word processor and spreadsheet.	H. Mixed user operating
	system

#### **ANSWERS**:

List A	(i)	(ii)	(iii)	(iv)	(v)
List B

b) In which part of the system unit is the device identified in part (a) allocated?

.....

- c) Explain three functional elements of the device identified in part (a)
  - (i) .....
  - (ii) .....
  - (iii) .....
- 6. Study the screenshot of a worksheet given in Figure 3 and answer the questions that followed:

Figure 3

- a) Identify the features labelled with letter A and B in Figure 3.
- b) .....
- c) Explain three types of data entries in a given worksheet. Give one example

Student's Assessment Number
for each.
(i)
(ii)
(iii)
·····
d) What are the procedures required for creating borders in cell A2 to A5?
e) Which steps would you follow to align the word EXIT vertically?
7. You were given an assignment by your teacher to construct a friendly letter. In
attempting the task, students proposed to use electronic word processor instead of
paper to accomplish the task.
a) Why students suggest using electronic word processor instead of paper?
Give two reasons.
(i)
(ii)
b) Explain three possible text alignment features found in electronic word
processor.
(i)
(ii)
(iii)

8.	A computer lab is supposed to have enough ventilation and it should be well protected
	from dust all the time.
	a) Briefly explain two problems which may be caused by lack of ventilation in
	a computer laboratory.
	(i)
	(ii)
	b) Briefly explain two problems which may occur if a computer laboratory is
	not well protected from dust.
	(i)
	(ii)
	c) What are the two measures that should be taken to ensure proper ventilation
	in the computer laboratory?
	(i)
	(ii)
9.	During class discussion on Information and Computer Studies subject, you noticed
	that your fellow students confused between the concept of a file and a folder.
	a) How can you differentiate a file from a folder?
	b) Which steps would you follow to create the folder on the desktop?
	(i)
	(ii)
	(iii)
	(iv)

Student's Assessment Number
c) Which steps would be followed by students in order to save file in the
created folder?
(i)
(ii)
(iii)
(iv)
(v)
(vi)
CECTION C (15 M I )
SECTION C (15 Marks)
Answer all questions from this section
10. The headmaster uses computer network to share students' reports with the subject
teachers. However, he is interested to know the components that compose computer
teachers. However, he is interested to know the components that compose computer network. Describe to him the four basic elements of a computer network.
network. Describe to him the four basic elements of a computer network.
network. Describe to him the four basic elements of a computer network.
network. Describe to him the four basic elements of a computer network.
network. Describe to him the four basic elements of a computer network.
network. Describe to him the four basic elements of a computer network.
network. Describe to him the four basic elements of a computer network.
network. Describe to him the four basic elements of a computer network.
